Anti-what? Antioxidants.

You read about them in newspapers, on TV talk shows, on the radio, in your physician's office. But in spite of the headlines, there's still much confusion. What exactly do they do? Do they really work? Which one is the most effective?

To understand antioxidants, you have to start with mutant molecules scientists call free radicals. Free radicals are unstable atoms that roam the body stealing stable electron partners from other cells causing damage. They are triggered by the air we breathe, the environment we live in. Exposure to them is inescapable. But luckily, Mother Nature provided us with antioxidants—the good guys, whose mission is to wipe out free radicals.

Now new research at several major universities has proven that rare Silver Tip White Tea is among the most potent antioxidants, anti-agers, anti-stress, anti-smoke, anti-pollution antidotes.

Origins was the first to formulate this potent ingredient into a collection of powerful skin protectors we call **A Perfect World™**. **A Perfect World™** creates a protective bubble around skin so that no static, stress or toxic grime can age your skin before its time. And by helping repel negative forces, skin is free to renew, repair and

Silver tip white tea

Just like those other teas, white tea come from the Camellia sinensis plant. But the leaves are picked and harvested before they open fully, when the buds are still covered by fine white hair. Hence the name.

For centuries, Chinese emperors enjoyed its exquisite taste and fragrant, flowery aroma. This magic drink was prized for relieving fatigue, delighting the soul, strengthening the will and enhancing vision. The extremely rare Silver Tip White Tea was prized by emperors as the key ingredient in China's famed elixir of immortality.

Origins discovered that this legend has more than a leaf of truth behind it. White Tea is considered to be one of the world's most potent antioxidants, which can help your skin look younger, longer.
